## DETAILED ACTION

### *Election/Restriction*

1. Applicant's election without traverse of species hydroxyl and the sub-species diol in Paper No. 7 is acknowledged.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 55-73 are rejected under 35 U.S.C. 103(a) as being obvious over INSLEY et al (US Patent 4,755,178).

INSLEY et al discloses a method of binding super-absorbent particles to fibers comprising the steps of: (a) providing fiber comprising hydrogen bonding functional sites,

Art Unit: 1731

natural or synthetic fibers, and a binder comprising a non-polymeric binder having functional groups selected from the group consisting of a hydroxyl, sub-specie diol, such as polyols, glycerol, or glycol, (b) combining super-absorbent particles having a hydrogen or a coordinate covalent bonding functional site with the fiber; and (c) binding the particles to the fiber (col. 4-6). Alternatively, the use of other equivalent hydroxyl sub-specie or absorbent particle would have been obvious to a skilled artisan as mere using similar component to achieve similar result.

As for claims 56-73, they are taught in cols. 4-7. Alternatively, the adjust of the compositions of the components would have been obvious to meet certain particular use or product because this is taught in col. 5-7, 9-11.

No claims are allowed.

5. When filing a FAX in Group 1300, please indicate in the Header (upper right) "Official" for papers that are to be entered into the file, and "Unofficial" for Draft Documents and other Communications with the PTO that are not for entry into the file of the application. This will expedite processing of your papers.
